ICT & 5G CONSULTING

• 4G/5G SUPPORT ON END TO END LAUNCH :

5GWorldPro work with you through all steps from design through vendor selection, capacity study, lab testing, live trials, optimisation and commercial go-live ...

• INTRODUCTION OF NEW TECHNOLOGY :

Our teams will help you introduce the right service and technology at the right moment. We can help and assist you to introduce technologies like 5G, Edge Computing, VOLTE, NFV, IoT or Open Ran or any other new technologies to develop new use cases

• 5G ARCHITECTURE STRATEGY :

We will help you decide to implement the right 5G architecture, Non-Standalone (NSA) or Standalone (SA) network which is a critical decision within any 5G deployment strategy.

• 5G SPECTRUM STRATEGY :

Developing spectrum strategy is becoming increasingly complex as licensing, technology, traffic and competitive dynamics are creating unprecedented situations for operators and regulators.

• TECHNOLOGY SUNSET :

Sunseting means that a mobile network operator shuts old cellular technology new ones rise to take their place In many cases,. we will help you to develop the technical and economical plans to smoothly migrate without any KPI degradation into new technology.

ICT & 5G NETWORK SERVICES

• IOT PROJECTS :

We're your one-stop for IoT projects—from design to deployment. With expertise in Nb-IoT, LTE-M, LoRa, and 4G/5G, we work closely with partners to craft tailored solutions that will efficiently solve your IoT challenges.

• GLOBAL RAN PARAMETERS STANDARDIZATION :

5GWorldPro offer to extract an updated RAN parameter baseline for all vendors and technologies that the client deploys. Based on this revised baseline we carry out a global RAN parameter consistency check and inconsistency cleanup services.

• DRIVE TESTING :

5GWorldPro provides comprehensive network benchmarking services using field drive testing. We tailor the project scope and team size based on customer KPI requirements.

• RADIO PLANNING AND OPTIMISATION SERVICE :

We guarantee performance improvements and optimisation of coverage, deployed capacity and quality of cellular networks. This will result in increased network ability to handle the traffic while reducing the number of resources required...

• SMAT CAPEX PLANNING

Our inhouse tool allows you to define the optimal investment plan and optimize Mobile Access Capex which is today one of the main CAPEX domains for operators,

Thanks!

Lets dicuss about your training and consulting needs in 5G and ICT
